● *Our thinking is designed.*

Our designs are thought through.

●

The DNA of Design Thinking runs through every 24K project. It means that the relevance of purpose is not lost while designing and the design is not compromised for the purpose. Designers and engineers work together to deliver a holistic, enriching and sustainable living experience.

'NOW Realty' is a dynamic new real estate venture in Pune from the industryveteran Mr. Rajendra Pate. With over 3 decades of experience in the real estate industry, Mr. Pate's vision to create living spaces that can stand the test of time, takes shape in the form of NOW Realty. Since every home is bought with the dream of nurturing generations, the company will work towards this pursuit of providing spaces where life is lived in the present, in the moment, every single day.

This futuristic approach and decades of past experience will translate every project to a landmark and every home to a holistic living experience for every resident; now and forever.

Timelessness in every Space

Spaces never get old; it is only the things on them that catch up the age factor. Take nature for instance. A fresh tree, is always fresh irrespective of its age. When nature can get young with every passing year, can our living spaces too be that way? This sheer question has resulted in the evolution of Now Realty. Where every construction is thought through to deliver a holistic living experience that can stand the test of time.

A perfect blend of both worlds

The 24k life & a serene living experience.

Construction Technology

The Alu-Form system is a revolutionary innovation in construction technology

- More seismic resistance: - The box type construction provides more seismic resistance to the structure.
- Increased durability: - The durability of a complete concrete structure is more than conventional brick bat masonry.
- Lesser number of joints thereby reducing the leakages and enhancing the durability.
- Higher carpet area- Due to shear walls the walls are thin thus increasing area.
- Integral and smooth finishing of wall and slab- Smooth finish of aluminium can be seen vividly on walls.
- Uniform quality of construction – Uniform grade of concrete is used.
- Negligible maintenance – Strong built up of concrete needs no maintenance.
- Faster completion – Unsurpassed construction speed can be achieved.
