The trees provide abode to the birds as well as nesting place and the colours and pollinators of shrubbery planted all over attract butterflies .The water bodies in the town ship at various locations facilitate for the drinking water and also food in the form of aquatic species for these birds.

Bird Feeders, which are part of Ahmedabad heritage also, is a value addition in the township to take care of the food and water for the birds in a safe environment. A dedicated team has been deployed to feed the birds at various locations regularly every day in the township which is a testament to the seriousness with which this effort is being pursued.

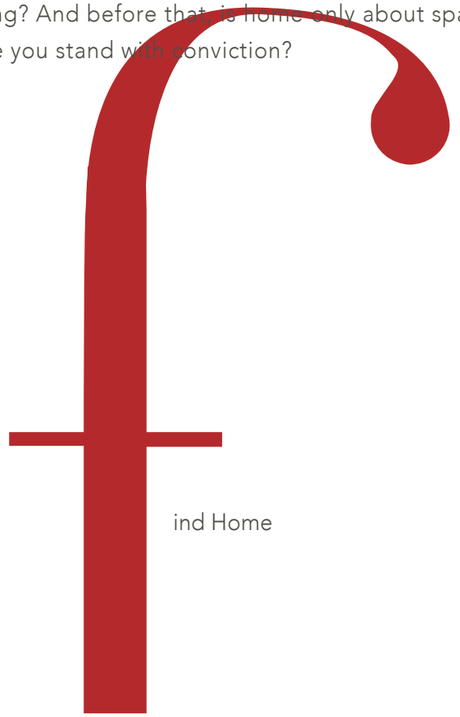

A culture has been imbibed in the township to conserve the flora and fauna to enhance the co-existence of various species with human beings.

To ensure healthy life for all living beings at Uplands, it is ensured that best quality organic treatments are being given to all the plants, trees and greens. This is a big step which helps in our co-existence with nature. Water conservation initiatives like recharge wells, innovatively designed plant treatment conduits have been deployed which help in conserving precious natural resource for this beautiful eco-diversity which is taking shape at Uplands.

The sophisticated done well is art.

What is Home?

Is it a physical structure? Is it a place to keep all your obsessions, neatly stacked up in multiple rooms? Is home merely your lifestyle? Or is it about a space that comes alive the moment you step in? Is home also about the space around? The shades of green, brown and blue? Or is it the entertainment you indulge in? What makes the home a space worth living? And before that, is home only about spaces? Is it just a place where you sit in comfort? Or is it where you stand with conviction?
