

Every
amenity is
designed
to give you
More of Life

We've made
the expected
amenities better.

And pushed the
benchmark of what
a real amenity
should be.

Raghava Halo treats health
as part of daily life,
not a weekend correction.

From fitness zones and
sports courts to advanced
wellness, recovery, and body
awareness, the ecosystem is
designed to make healthy
routines easier to begin and
easier to continue.

A home built around
health, family, convenience
and community for

More *of* Life

Hyderabad.

Homes Designed Around How Families Live

Raghava Halo offers exclusive 3 BHK residences designed to support modern family life.

Spaces are designed to feel open.
Rooms are planned for better usability.

Layouts support natural light, ventilation and movement.
Most homes include walk-in closets for better organisation.
A home should not only look good on a plan.
It should work beautifully every day.

Every floor plan at Raghava HALO is designed to create more of life.

Thoughtfully planned spaces maximize natural light, ventilation, and effortless movement. Because true luxury is experienced in the way a home feels, every single day.

Amenities

that improve
your life, not just
fill a brochure.

FITNESS ECOSYSTEM

More Movement, Closer To Home

The fitness ecosystem brings together spaces for strength, stamina, flexibility, training, and everyday movement. Whether you prefer a focused workout, a group routine, a quiet stretch, or a sport that keeps you competitive, Halo gives movement a place in your daily rhythm.

SPORTS ECOSYSTEM

A Community That Keeps You in Play

Sport has a way of making life feel young.
A morning rally.
An evening match.
A quick game after work.
A weekend with neighbours that starts
with one point and ends with laughter.

The body needs more than just exercise.

It needs recovery.

It needs care.

It needs rituals that help it reset.

Raghava Halo brings advanced wellness spaces into the residential ecosystem, allowing residents to care for themselves without leaving the comfort of the community.

A Childhood Designed For The Next Generation

Children today are growing up in a world that is changing faster than any generation before them.

They need more than play areas.

They need places to think, question, build, move, explore and create.

At Raghava Halo, childhood is treated as an integral part of the community design.

The spaces are imagined to support curiosity, confidence, social learning, physical development, and future readiness.

LEARNING ECOSYSTEM

Where Learning Does Not End at School

Some of the most important learning happens outside the classroom.

In the questions children ask.

In the things they build.

In the friends they make.

In the small experiments that teach them how the world works.

LEARNING SPACES INCLUDE:

- Digital and Smart Classrooms
- Montessori-inspired Social Learning Zone
- A learning lab inspired by MIT and Reggio Emilia, featuring a Thinker and Maker Studio, along with robotics and LEGO technical labs
- Nordic Physical Education

A home where children do not just grow taller.

They grow sharper.

FUTURE READY CHILDREN

Screen Time, Reimagined

The problem is not technology.

The problem is passive technology.

At Halo, technology is imagined as something children can use to create, build, and understand the world better. Screen time is reimagined as active learning through tools, labs, and future-ready experiences.

FUTURE LEARNING INCLUDE:

- AR and VR stations
- AI and robotics
- Coding, software and 3D
- Mechanical construction
- Drone technology

Here, children do not only consume the future.

They start building it.

PLAY AND PHYSICAL DEVELOPMENT

More Than a Play Area

A good childhood needs movement.

Running Climbing Balancing Falling

Trying again.

Learning how the body works.

Raghava Halo creates an ecosystem for physical intelligence, play, and early development, giving children spaces that support both freedom and growth.

CHILDREN'S SPACES INCLUDE:

- Kids' Adventure Zone
- Physical Intelligence Zone
- Kids' Fitness Programmes
- Kids' Play and Adventure Zone
- Toddler Play Area
- Sand Pit
- Tot Lot
- Children's Floor Games
- Crèche and Toddler Centre

A childhood with more movement becomes a childhood with more confidence.

A Home That Saves Time

Time is the most expensive thing in the city.

The convenience ecosystem is planned to bring everyday needs closer, so residents can spend less time managing life and more time living it.

Work.
Wellness.
Family.
Groceries.
Coffee.
Meetings.
Recovery.
Play.

At Halo, the day moves more smoothly.

EVERYDAY CONVENIENCE

Small Services. Big Difference.

The best convenience is not loud.
It simply makes the day easier.

Grocery Access

Pharmacy Access

Conference Rooms

COMMUNITY AND SOCIAL LIFE

Meet People Who Live Like You Do

A good community is not created by walls and gates.

Raghava Halo is designed with places for conversation, celebration, work, play, and shared experiences.

These spaces help neighbours become familiar faces, then friends, and finally part of everyday life.

More Connected To What Matters

Kondapur gives Raghava Halo one of its strongest advantages.

It places residents close to the city's major work zones, healthcare centres, schools, colleges and lifestyle destinations.

This matters because the location of a home does not only decide where you live. It decides how much time you get back every day.
