

*Storm water drainage setback
and flow direction for proposed
drainage which we paid fees to
corporation*

This is an aerial photograph of a residential street grid. The streets are paved in dark asphalt. The surrounding areas are mostly bare, light-brown soil with some sparse green grass. Hand-drawn green lines are overlaid on the image, primarily following the edges of the lots and the centerlines of the streets, indicating setbacks for proposed drainage. Hand-drawn red arrows are also overlaid, showing the intended direction of stormwater flow. The arrows generally point towards the street centerlines and then down the length of the streets. A text box with a white background and a black border is positioned in the upper-middle part of the image, containing the text: "Storm water drainage setback and flow direction for proposed drainage which we paid fees to corporation".

Place reserved for storm water drainage
